GMAT MATH

Percent

1

- What is the percent formula?
- How much is 15 percent of 20?

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent 2

3

- What is the formula for percent change?
- If Jack got a raise from \$15 per hour to \$18 per hour, what was the percent increase?

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent | Answers

2

- Percent Formula:
Part = Percent x Whole
- For example, 15% of 20 is:
$$\frac{15}{100} * 20 = \frac{300}{100} = 3$$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent 2 | Answers

4

- **Percent Change Formula:**
$$\frac{\text{amount of change}}{\text{original amount}} \times 100\%$$
- **Jack's Raise:**
$$\frac{18 - 15}{15} \times 100\% = \frac{3}{15} \times 100\% = \frac{100}{5} = 20\%$$
- **!** Make sure you use the original amount (15), not the new one (18)

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent 3

5

- If the production of hybrid cars tripled last year, by how many percent did it increase?
 - 100%
 - 200%
 - 250%
 - 300%
 - 333%

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent 4

7

- 50% of 25 is 25% of which number?

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent 3 | Answers

6

- **The correct answer is B – increased by 200%**
- For example, if production was 10 cars, and it tripled to 30 cars, the increase was 20 cars, which is 200% of 10

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percent 4 | Answers

8

- There are 2 solutions to this problem:
- Long one:
 - 50% of 25 is 12.5
 - $12.5 * 100 = x * 25$
 - $x = 50$
- Short one but a harder to come up with:
 - $50\% * 25 = x * 25\%$
 - $50 = x$

MATH: ARITHMETIC

Odd/Even Rules 3 | Answers

14

- Use the “plug numbers” method to check each answer choice. Let's take 1:

A. $2*1 - 3 = -1$ (Odd)

B. $\frac{1-1}{2} = 0$ (Even) – however, just in case, let's try 3.
 $\frac{3-1}{2} = 1$ (Odd). It usually is a good idea to run through 2 different numbers if you get zero or similar

C. $\frac{1}{2} - 1 = -\frac{1}{2}$ (not an integer)

D. $1 + 2 = 3$ (Odd)

E. $2 + 2 = 4$ (Even)

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Odd/Even Rules 4 | Answers

16

- Statements (1) and (2) combined are insufficient. Consider $A=6$, $B=4$, and $C=2$ (the answer is "yes") and $A=0.5$, $B=0.3$, and $C=0.2$ (the answer is "no").
- Do not assume that the numbers are integers if the question does not mention it.
- The correct answer is E.

- Yes. Divisibility by 3 – sum of all digits is a multiple of 3
- Yes. Divisibility by 4 – last 2 digits is a multiple of 4
- Yes. Divisibility by 5 – the last digit is either 0 or 5
- Yes. Divisibility by 6 – the sum of digits is a multiple of 3 and the last digit is even
- Yes. Divisibility by 9 – the sum of digits is a multiple of 9

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Divisibility 2 | Answers

20

- The best way to approach this question is to plug in several sets of numbers
- Many are tempted to plug 3 for x and then for S_2 , the only value y can have is 3; in that case, the answer is Yes.
- But if we try $x=81$ and $y=\frac{1}{9}$, then x is an integer divisible by 3, xy is an integer divisible by 9, but $x^2y^4 = 1$ and is not divisible by 9.
- **The answer is E**

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Number Properties

21

- Which of the following integers represents a sum of 3 consecutive even integers?
 - ▣ 200
 - ▣ 303
 - ▣ 400
 - ▣ 554
 - ▣ 570

MATH: ARITHMETIC

Number Properties | Answers

22

- To answer the question, check which integer is both divisible by 3 (since there are 3 integers) and is even. The only number that falls into both of those 2 categories is 570.
- **Correct answer is E**

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Number Properties 2 | Answers

24

- Substitute x , y , and z in the original equation to get the following: $x^2 - 2x - 3 = 0$; The solutions to this equation are $x = -1$ and $x = 3$.
- Statement 1 is sufficient. If $x > 0$, then the only solution is $x = 3$. The result is $27 + 16 + 6 = 49$, which is divisible by 7.
- Statement 2 is sufficient. If $y = 4$, plugging in this value into $x^2 = y + 5$, gives us that $x = 3$ or $x = -3$. However, based on the above, $x = 3$ or $x = -1$. Therefore $x = 3$. Sufficient.
- **The correct answer is D.**

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Absolute Value 4

59

- Is $M < 0$?
 - $-M = |M|$
 - $M^2 = 9$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Absolute Value 3 | Answers

58

- $|x - 5| = 10$
- We must evaluate both the positive and negative outcome since the absolute value “removes” the negative sign
- Thus, we have 2 equations:
 - $x - 5 = 10$
 - $x - 5 = -10$ (in case it was a negative expression)
- Thus $x = 15$ and -5 . (Plug in both to check)
- Absolute value inequalities and equations will almost always have 2 answers/solutions!

MATH: ARITHMETIC

Factors | Answers

62

- Advanced method for finding the number of all possible factors:
 - Write out each prime factor and their power, for example, 12 can be written as follows:
 - 2^2
 - 3^1
 - 5^0 etc (all other primes will have a zero power)
 - Add 1 to all powers and multiply them: (in this case 6) and that's the number of factors (1, 2, 3, 4, 6, 12)
 - Prime Factors of 462 = $2^1, 3^1, 7^1, 11^1$
 - Total number of factors: $2 \times 2 \times 2 \times 2 = 2^4 = 16$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Factors 2 | Answers

64

- Vast majority of integers have an even number of factors such as 12 for example: 1, 2, 3, 4, 6, 12. Thus when finding the total number of factors, make sure it is an even number
- The only integers that have an odd number of factors are perfect squares (that's numbers such as 4, 9, 16, 25, 36, etc). Try 25 for example, it has factors of 1, 5, and 25. Factors of 36 are 1, 2, 3, 4, 6, 9, 12, 18, 36.

□ $3^{3^3} = ?$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 4 | Answers

74

- $(3^3)^2 = 3^6$
- When a number taken to a power is taken to another power, you need to multiply the exponents ($2 * 3$)

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 5 | Answers

76

- $3^{3^3} = 3^{27}$
- Start operations from outside and work your way in: 3 taken to the power of 3 is 27. Thus the base of 3 is taken to the power of 27.

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 6

77

□ $2^{-2} \times 2^{-3} \times 2^6 \times 2^{-4} = ?$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 7

79

□ $5^0 = ?$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 6 | Answers

78

□ $2^{-2} \times 2^{-3} \times 2^6 \times 2^{-4} = 2^{-3} = \frac{1}{2^3} = \frac{1}{8}$

- Negative powers turn a number to a reciprocal number taken to that power.

For example $2^{-2} = \frac{1}{2^2} = \frac{1}{4}$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 7 | Answers

80

□ $5^0 = 1$

- Any number (positive or negative) taken to the power of 0 (zero) equal to 1.

- Not tested on the GMAT, zero to the power of zero is also 1.

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 8

81

□ $4^{\frac{1}{2}} = ?$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 9 (Ultra Hard)

83

- If m and n are positive integers, is the remainder of $\frac{10^{m+n}}{3}$ larger than the remainder of $\frac{10^{n+m}}{3}$?
- $m > n$
 - The remainder of $\frac{n}{3}$ is 2

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 8 | Answers

82

□ $4^{\frac{1}{2}} = \sqrt{4} = 2$

- Fraction powers are interpreted as follows: the denominator is the root and numerator is the power. For example $3^{\frac{2}{3}} = \sqrt[3]{3^2}$ or $2^{\frac{1}{2}} = \sqrt{2}$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Powers 9 | Answers

84

- Statement (1) by itself is insufficient. In expression $10^m + n$, the sum of digits of 10^m is always 1 and it is the value of n that determines the remainder of $\frac{10^{m+n}}{3}$. If you plug in $m=2, n=1$ (the answer is "yes") and $m=3, n=2$ (the answer is "no").
- Statement (2) by itself is sufficient. If the remainder of $\frac{n}{3}$ is 2, as S2 states, then is 2, 5, or 8 and the sum of the digits of $\frac{10^{m+n}}{3}$ is divisible by 3. Therefore, the remainder of $\frac{10^{m+n}}{3}$ is 0, which cannot be larger than the remainder of $\frac{10^{n+m}}{3}$ no matter what m is.
- **The correct answer is B.**

MATH: ARITHMETIC

Consecutive Numbers

87

- What is the sum of consecutive integers -9, -8, -7, -6, -5, -4, -3, -2, -1, 0, 1, 2?

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Percentiles | Answers

86

- Take each test result separately:
 - ▣ Test 1: $120 \times 80^{\text{th}} = 96$ (she scored better than 96 students)
 - ▣ Test 2: She scored better than 176 students ($200 - 24$)
- Sum up the results:
 - ▣ $96 + 176 = 272$
 - ▣ $120 + 200 = 320$
- $\frac{272}{320} = 85^{\text{th}}$ percentile

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Consecutive Numbers | Answers

88

- Sum of consecutive integers equals the mean multiplied by the number of terms, n . Given consecutive integers -9, -8, -7, -6, -5, -4, -3, -2, -1, 0, 1, 2
 $mean = \frac{-9+2}{2} = -3.5$ (mean equals to the average of the first and last terms), so the sum equals to $-3.5 \times 12 = -42$.

Recurring Decimal

91

- Express 0.393939... in a fraction format

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Evenly Spaced Set | Answers

90

- The sum of elements of evenly spaced set is given by the formula
- $\text{Sum} = \frac{a_1 + a_n}{2} \times n$
- Therefore, $\frac{9+24}{2} \times 6 = 99$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Recurring Decimal | Answers

92

- **To convert a recurring decimal to fraction:**
 1. Separate the recurring number from the decimal fraction
 2. Annex denominator with "9" as many times as the length of the recurring number
 3. Reduce the fraction to its lowest terms

Example #1: Convert 0.3939... to a fraction

- 1: The recurring number is 39
- 2: $\frac{39}{99}$ - the number is 2 digits so two nines are added
- 3: Reducing it to lowest terms: $\frac{13}{33}$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Fractions (Extra Hard)

93

- If a , b , and c are positive distinct integers, is $\frac{\left(\frac{a}{b}\right)}{c}$ an integer?

- $c = 2$

- $a = b + c$

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Fractions | Answers

94

- Statement I is insufficient since it does not provide enough information about b or c
- Statement II: We can rewrite $\frac{\left(\frac{a}{b}\right)}{c}$ as $\frac{a}{bc}$
- Now plug in the value for a from S2: $\frac{b+c}{bc} = \frac{1}{b} + \frac{1}{c}$
- since b and c are distinct positive integers and b is not equal to c , the expression cannot be an integer
- **The correct answer is B**

© GMAT Club – contributing to each other's learning

MATH: ARITHMETIC

Algebra (Hard)

1

- If each expression under the square root is greater than or equal to 0, what is $\sqrt{x^2 - 6x + 9} + \sqrt{2 - x} + x - 3$?
- $\sqrt{2 - x}$
 - $2x - 6 + \sqrt{2 - x}$
 - $\sqrt{2 - x} + x - 3$
 - $2x - 6 + \sqrt{x - 2}$
 - $x + \sqrt{x - 2}$

© GMAT Club – contributing to each other's learning

MATH: ALGEBRA

Algebra | Answers

2

- Based on the setup (and Math principles tested on the GMAT), $(2 - x)$ has to be ≥ 0 . Therefore $x \leq 2$.
- $\sqrt{x^2 - 6x + 9} = \sqrt{(x - 3)^2} = 3 - x$
- Because $x \leq 2$, $x - 3 < 0$
- Therefore: $3 - x + \sqrt{2 - x} + x - 3 = \sqrt{2 - x}$
- **The correct answer is A**

© GMAT Club – contributing to each other's learning

MATH: ALGEBRA

Average

1

- If the average of 5 consecutive integers is 12, what is the average of the even only integers?
 - 10
 - 12
 - 13.5

MATH: STATISTICS

Standard Deviation 4

19

- What is the Standard Deviation of a set of consecutive even integers?
(1) There are 39 elements in the set.
(2) the mean of the set is 382

© GMAT Club – contributing to each other's learning

MATH: STATISTICS

Standard Deviation 3 | Answers

18

- We don't need to calculate as decrease in all elements of a set by a constant percentage will decrease the standard deviation of the set by the same percentage (the average is decreased by 17% as well as the difference between average (mean) and all elements or their squares. Thus the decrease in standard deviation is 17%.
- You can always try to model a set of 3 numbers
- P.S. the 17% has been verified in Excel

© GMAT Club – contributing to each other's learning

MATH: STATISTICS

Standard Deviation 4 | Answers

20

- Before reading Data Sufficiency statements, what can we say about the question? What should we know to find standard deviation? "consecutive even integers" means that all elements strictly related to each other. If we shift the set by adding or subtracting any integer, it does not change the standard deviation. One thing we should know is the number of elements in the set, because the more elements we have the broader they are distributed relative to the mean. Now, look at DS statements, all we need it is just first statement. So, A is sufficient.

© GMAT Club – contributing to each other's learning

MATH: STATISTICS

Standard Deviation 5

21

- Set A consists of 19 integers with mean 4 and standard deviation of 3. If a new set B is formed by adding 2 more elements to the set A, what two elements will decrease the standard deviation the most?
 - A) 9 and 3
 - B) -3 and 3
 - C) 6 and 1
 - D) 4 and 5
 - E) 5 and 5

© GMAT Club – contributing to each other's learning

MATH: STATISTICS

Standard Deviation 5 | Answers

22

- **Solution:** The closer to the mean, the smaller the standard deviation, and therefore, the greater the decrease in standard deviation. D has 4 (equal to the mean) and 5 (differs from mean only by 1).
- All other options have a greater deviation from the mean
- **Answer: D**

MATH: WORD PROBLEMS

Group Problems

9

- Out of 90 conference attendees, 50 registered for the basic workshop and 60 signed up for the advanced workshop. If 20 attendees have not signed up for a workshop yet, how many signed up for both advanced and basic workshops?

Group Problems 2

11

- The office of 120 is split between male and female employees at the ratio of 3:5. If 40% of the employees are married and 20 of the married employees in the office are men, how many of the women working in the office are single?

Group Problems | Answers

10

- The best and easiest approach to solving this type of problems is using the both/neither formula (alternative option is a Venn diagram).
- $\text{Group1} + \text{Group2} + \text{Neither} - \text{Both} = \text{Total}$
- $50 + 60 + 20 - \text{Both} = 90$
- $130 - \text{Both} = 90$
- $\text{Both} = 40$
- The key is to memorize the formula and one sample question so you can plug in numbers on the test

Group Problems 2 | Answers

12

- To answer this question the fastest, we can put this table together:

	Male	Female	Total
Married	20	X	48
Single		75 - X	72
Total	45	75	120

- Thus $20 + X = 48$; $X = 28$. We can do the rest of the math and fill out the entire table to make sure your calculations are correct

Volume/Mixture Problems (Hard)

13

- If a farmer sells 15 of his chickens, his stock of feed will last for 4 more days than planned, but if he buys 20 more chickens, he will run out of feed 3 days earlier than planned. If no chickens are sold or bought, the farmer will be exactly on schedule. How many chickens does the farmer have?

Counting Problems (Ultra Hard)

15

- In a game of chess, the moves of whites and blacks alternate with whites having the first move. During a chess tournament, whites have made 2319 moves altogether while blacks have made 2315 moves. If in any game the side that made the last move did not lose, which of the following can be true about the tournament?
- I. Blacks lost 5 games
- II. Blacks won more games than whites
- III. All games ended in a draw

gmatclub

© GMAT Club – contributing to each other's learning

MATH: WORD PROBLEMS

Volume/Mixture Problems | Answers

14

- Very hard problem. Several solutions exist; this one is probably not the most correct but the quickest:
- Let X be the number of chickens and Y be the days they can survive on the current feed:
- $(x-15)(y+4)=(x+20)(y-3)$
- ~~$xy + 4x - 15y - 60 = xy - 3x + 20y - 60$~~
- $4x - 15y = 20y - 3x$
- $7x = 35y$ or $x = 5y$
- Solving the first equation, we get $x=60$ and $y=12$

gmatclub

© GMAT Club – contributing to each other's learning

MATH: WORD PROBLEMS

Counting Problems | Answers

16

- From the stem it follows that there were only 4 games in which whites had the last move. These 4 games were responsible for the difference in the total number of moves made by whites and blacks during the tournament. We know that these 4 games were not won by blacks (but they could well have ended in a draw). All the other games could have been won by blacks or ended in a draw. **Thus, scenarios II and III are possible.**
- Scenario I is impossible. It means that there were at least 5 games in which whites had the last move. If this were true then the difference between the total number of moves of whites and blacks should be at least 5. In fact, it's only 4.

Triangles 7 | Answers

14

- In 30-60-90 triangle, the sides are x , $x\sqrt{3}$, and the hypotenuse is $2x$ (double the size of the smallest side)

© GMAT Club – contributing to each other's learning

MATH: GEOMETRY

Triangles 8 | Answers

16

- The area of the triangle ABC is $\frac{1}{2} \left(\frac{1}{a} + \frac{1}{a} \right) a^2 = a$
- Statement (1) by itself is sufficient. In the extreme case when Angle ABC is right, the triangle BOC is isosceles and thus $a^2 = \frac{1}{a}$ and the area of the triangle ABC is $a = 1$. If angle ABC is smaller than 90 degrees, then the area exceeds 1 due to the increase of the height a^2 .
- Statement (2) by itself is insufficient. As long as $a > 0$, the perimeter of the triangle ABC is always greater than $\frac{4}{a}$
- The correct answer is A.

MATH: GEOMETRY

Coordinate Geometry 10 (Hard)

39

- Does the curve $(x - a)^2 + (y - b)^2 = 16$ intersect the Y axis?
 - 1) $a^2 + b^2 > 16$
 - 2) $a = |b| + 5$

© GMAT Club – contributing to each other's learning

MATH: GEOMETRY

Coordinate Geometry 9 | Answers

38

- The key to solving the intersection questions is that at the point of intersection, both lines will have the same X and Y coordinates.
- Thus, if Y coordinates are the same, then we can put the two equations together: $3x-3 = 2.3x+4$
- $0.7x = 7$; $x = 10$
- Now we still need to find the Y intercept. Plug 10 into one of the equations: $3*10-3 = 27$
- **Intersection point: (10, 27)**

MATH: PROBABILITY & COMBINATIONS

Probability 8 – Part 2 | Answers

38

- **Reverse Combinatorial Approach:**
 - Instead of counting probability of occurrence of certain event, sometimes it is better to calculate the probability of the opposite and then use formula $p = 1 - q$.
 - The total number of possible committees is $C_2^8 = 28$
 - The number of possible committee that does not include both Bob and Rachel is: $m = C_2^6 + 2 \times C_1^6$ where, C_2^6 is the number of committees formed from 6 remaining people
 $2 \times C_1^6$ is the number of committees formed from Rob or Rachel and one out of 6 other people
 - $P = 1 - \frac{m}{N} = 1 - \frac{C_2^6 + 2 \times C_1^6}{C_2^8} = 1 - \frac{15 + 2 \times 6}{28} = 1 - \frac{27}{28} = \frac{1}{28}$

gmatclub

© GMAT Club – contributing to each other's learning

MATH: PROBABILITY & COMBINATIONS

Probability 8 – Part 3 | Answers

40

- **Reverse probability approach:**
 - We can choose any first person.
 - Then, if we have Rachel or Bob as the first choice, we can choose any other person out of the 6 remaining people.
 - If we have neither Rachel nor Bob as first choice, we can choose any person out of the remaining 7 people.
 - The probability that the committee includes both Bob and Rachel is: $P = 1 - \left(\frac{2}{8} \times \frac{6}{7} + \frac{6}{8} \times 1 \right) = 1 - \frac{27}{28} = \frac{1}{28}$

Probability 9

41

- Julia and Brain play a game in which Julia takes a ball and if it is green, she wins. If the first ball is not green, she takes the second ball (without replacing first) and she wins if the two balls are white or if the first ball is gray and the second ball is white. What is the probability of Julia winning if the jar contains 1 gray, 2 white and 4 green balls?

MATH: PROBABILITY & COMBINATIONS

Probability 9 | Answers

42

- Sometimes, at 700+ level you may see complex probability problems that include conditions or restrictions. For such problems it could be helpful to draw a probability tree that include all possible outcomes and their probabilities.

- Now, It is pretty obvious:

$$P = \frac{4}{7} + \frac{2}{7} \times \frac{1}{6} + \frac{1}{7} \times \frac{2}{6} = \frac{2}{3}$$

VERBAL STRATEGIES

Contents of Flash Cards

2

- Basic Strategies and Principles of Sentence Correction, Critical Reasoning, and Reading Comprehension with a few examples
- Illustration of errors and right answer choices through examples

Critical Reasoning

Basic Deconstruction

- **Step 1:** Read the question stem and categorize the question.
- **Step 2:** Read the stimulus and identify the premise and the conclusion
- **Step 3:** Try to focus on the conclusion and think of answer choices that might be right
- **Step 4:** Use process of elimination to rule out wrong answer choices. Don't try to make them fit!
- **Step 5:** Make sure answer choice makes sense!

Main parts of a CR question

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Main parts of a CR question

5

- **Conclusion:** This is the final argument that the author makes.
- **Premise:** These are evidentiary statements that support the conclusion
- **Assumption:** These are unstated premises, on which the conclusion and sometimes the premise rest on.

Type I – Ascertain Conclusion

7

- These are questions where we **assume that the stimulus is true** and try to find **answer choices that are supported by the conclusion**
- Possible Question Types:
 1. Inference
 2. Main Point
 3. Must-be-True

Premise & Conclusion

6

PREMISE	CONCLUSION
Supports the conclusion – Answers the question of “Why?”	Has a tone of finality and conveys the final message of what the author is saying
Because	Thus
Since	Therefore
For/For the reason	Hence
Due to	So
As indicated by	As a result of/Consequently
Furthermore	Accordingly
Given that	It follows that/It must be that

Type II – Strengthen & Support

8

- These are questions where **we assume that the given answer choices are true** and try to pick the **best one that will support the stimulus**
- Possible Question Types:
 1. Strengthen
 2. Assumption

Type III – Weaken and Hurt

9

- This is basically the opposite of the above type and aims to **disprove the conclusion of the stimulus**. Hence **we take the answer choice to be true** here as well.
- Possible Question Types:
 1. Strengthen
 2. Assumption

VERBAL

Most Common Mistake Types

11

Out of Scope/Irrelevant Answers

- ❖ Talks about something completely irrelevant to the discussion at hand.
- ❖ People tend to pick these when they're completely unsure of what they're supposed to be doing

Tone Mismatch Answers

- ❖ Answers that don't agree with the tone of the passage
- ❖ Might be too strong or too weak when compared to stimulus

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Most Common Mistake Types

10

Opposite Answers

- ❖ Does the opposite of what the answer choice is supposed to do
- ❖ People pick them because they might get confused about the question type

Shell Game Answers

- ❖ Sounds really similar to the stimulus but differs by just the right amount to be incorrect but still lucrative.
- ❖ People pick these when they're not paying close attention

gmatclub

VERBAL

Main Point/Must-Be-True

12

"Which of the following represents the main idea of the paragraph?"
"Which of the following can be inferred from the above?"

Correct Answer Choices

- Can this answer choice be proven or validated by what is given in the stimulus? Is this answer choice true to the stimulus AND the main point of the passage, i.e. similar to the conclusion?
- Should be validated by the stimulus (Stimulus is taken to be true)
- Should be the main point of the stimulus, not just a premise (for Main Point questions)
- Will either restate conclusion or present it in a different manner

13

To be considered for this year's merit scholarship award, students need to have perfect attendance and a 4.0 GPA. Alex is the only person in the class who has a 4.0 but he has had 5 absences.

The claims above, if true, most strongly support which of the following conclusions?

- A. No student at this school has perfect attendance for the year
- B. Some students at this school who did not have a 4.0 also did not have perfect attendance
- C. Alex is the only student who could be considered for the award
- D. No student at this school qualifies for the award this year
- E. Many students have achieved perfect attendance but never 4.0 GPAs.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Weaken

15

"Which of the following, if true, calls into question the validity of the argument?"

"Which of the following most seriously undermines the conclusion?"

Correct Answer Choices

- Does this answer choice break down causality? Does it give an alternate cause, show that the cause-effect relationship is non-existent or reversed?
- Answer choice should break down structure of stimulus (Answer is taken to be true)
- Could be in relation to a gross generalization, a wrong conclusion or incorrect hypothesis from facts.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

A B C D E

14

A: Exaggeration.

B: Possible, but not necessary

C: The stimulus clearly says that you need both perfect attendance and 4.0 GPA.

D: This is true. If Alex is the only one who has a 4.0 and he doesn't have a perfect attendance, it means the entire school is barred from qualifying for the award. Correct choice.

E: Out of scope answer.

17

There are 350 brands of cell phones in the market today. However, our store only stocks the top 10 brands. In order to increase our sales, we plan to increase the size of our inventory to the top 50 brands.

Which of the following, if true, points out a major flaw in the plan above?

- A. The capabilities of the top five cell phones are almost the same, with no brand having consistent superiority in all respects.
- B. The top 8 brands account for almost all the cell phones sold
- C. As users get more sophisticated, they want to try out the lesser known brands which might offer some other value to them.
- D. Less popular brands provide little profit to the store because they have to be discounted to be sold
- E. The leading brands are now losing sales to less popular brands that offer similar features for a lower cost

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Strengthen

19

“Which of the following, if true, strengthens the argument the most?”
“Which of the following, if true, would most significantly help prove the scientist's hypothesis?”

Correct Answer Choices

- **Does this answer choice reinforce the conclusion directly? Does it validate an assumption or rule out a discrepancy? Does it help establish causality?**
- Answer choice should strengthen structure of stimulus (Answer is taken to be true)
- Needs to directly strengthen conclusion by bridging logical gaps, validating reasons or assumptions or finding missing links. If it's not a direct strengthening, move on! Don't try to make the connections!

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

A B C D E

18

A: Irrelevant. Does this affect profit margins for the store if they were to increase inventory? No

B: This means that the store already has the brands that sell the most. Increasing inventory will have little effect on profit margins. Correct Answer.

C: This almost strengthens the argument.

D: This tells you that the lesser brands will provide lesser profit. But “less” is a relative term. This is an unclear statement.

E: This almost strengthens the argument by favoring an increase in inventory. Hence incorrect.

Recently, several companies have withdrawn their ads from Magazine A, because the editorial board of the magazine had decided to change the image that the magazine portrays from one of family values to one concerned more with sex and violence. Surely this indicates that the decision-makers in advertising agencies do still have a sense of moral propriety that occasionally drives their actions.

Which of the following, if true, would strengthen this conclusion?

- A) The advertisers regularly review the placement of their advertisements.
- B) It is a rare event for several advertisers to withdraw all their advertisements simultaneously from a publication.
- C) The advertisers, when questioned, admitted that their clients would lose revenue as a result of the advertisements being withdrawn.
- D) The advertisers all placed new advertisements with other publications that emphasised family values.
- E) A survey of the readership of Magazine X suggested that the majority of the readership think that the standard of the magazine's contents had failed since its transformation.

Question from GMAT Club (95810)

© GMAT Club – contributing to each other's learning

VERBAL

Assumption

23

“The author assumes which of the following in saying that ...”
 “The argument cannot be true unless which of the following statements are assumed?”

Correct Answer Choices

- **Supporter:** Links unrelated elements in the stimulus and fills in logical gaps
- **Defender:** Eliminates the alternatives and any choices that might weaken the conclusion.
- **Assumption Negation Technique:** Narrow it down to the final answer choices and then negate them – the main modifier or a verb (such that the meaning of the sentence is reversed) and if the negated choice weakens the conclusion, the answer is right.

© GMAT Club – contributing to each other's learning

gmatclub

VERBAL

A B C D E

22

- A:** This is irrelevant to the question of moral propriety.
- B:** This doesn't necessarily point to moral propriety directly. Don't make unnecessary connections!
- C:** Once again, no correlation to what we're talking about
- D:** If this is true, then it shows that the agencies care about where their ads go. Hence correct.
- E:** This is about the magazine. Not the advertisers.

25

In theory, it's possible that bacteria developed on Mars early in its history and some were carried to Earth by a meteorite. However, strains of bacteria from different planets would probably have substantial differences in protein structure that would persist over time, and no two bacterial strains on Earth are different enough to have arisen on different planets. So, even if bacteria did arrive on Earth from Mars, they must have died out.

The argument is most vulnerable to which of the following criticisms?

- A. It fails to establish whether bacteria actually developed on Mars.
- B. It fails to establish how likely it is that Martian bacteria were transported to Earth.
- C. It fails to consider whether there were means other than meteorites by which Martian bacteria could have been carried to Earth.
- D. It fails to consider whether all bacteria now on Earth could have arisen from transported Martian bacteria.
- E. It fails to consider whether there could have been strains of bacteria that originated on Earth and later died out.

gmatclub

Question from GMAT Club (80725)

VERBAL

Resolve the Paradox

27

“Which of the following, if true, helps explain the paradox above?”
 “Which of the following, if true, helps explain the apparent discrepancy in the argument?”

Correct Answer Choices

- **Active Resolution:** Don't try to disprove the stimulus, take it as a given.
- **Does the answer choice address the facts?** The answer choice MUST conform to the stimulus
- The answer should address BOTH sides of the paradox, and resolve it. It shouldn't strengthen the paradox.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

A B C D E

26

- A:** This is irrelevant to the argument that states that even if bacteria came from Mars, they must have died out.
- B:** Out of Scope!
- C:** Again, this doesn't talk about bacteria strains dying out
- D:** If this is true, then there need not have to be any significant difference between the strains found on Earth, since they all originated from Mars.
- E:** We are not concerned about this.

A severe drought can lessen the total amount of government aid that US farmers receive as a group. The government pays farmers the amount, if any, by which the market price at which crops are actually sold falls short of a preset target price per bushel for the crops. The drought of 1983, for example, caused farm-program payments to drop by \$10 billion.

Given the information above, which of the following, if true, best explains why the drought of 1983 resulted in a reduction in farm-program payments?

- A. Prior to the drought of 1983, the government raised the target price for crops in order to aid farmers in reducing their debt loads.
- B. Due to the drought of 1983, United States farmers exported less food in 1983 than in the preceding year.
- C. Due to the drought of 1983, United States farmers had smaller harvests and thus received a higher market price for the 1983 crop than for the larger crop of the preceding year.
- D. Due to the drought of 1983, United States farmers planned to plant smaller crops in 1984 than they had in 1983.
- E. Despite the drought of 1983, retail prices for food did not increase significantly between 1982 and 1983.

VERBAL

Reasoning

31

“Which of the following most accurately describes the author’s method of defending the case?”

“Which of the following is most parallel to the argument in logical structure?”

Correct Answer Choices

- Should follow the same pattern of reasoning. Focus on the logic, not the content of the argument!
- **Answer choice must be a description of the author’s logic!**
- Answer choice should not be inconsistent with the stimulus, even if the stimulus has flawed logic. We are not asked to evaluate the logic of the stimulus; we are merely asked to find an answer that follows the same pattern – right or not.

© GMAT Club – contributing to each other's learning

VERBAL

A B C D E

30

A: Strengthens the paradox.

Amount Paid = Target – Market. We can’t say anything unless we know what happened to the market price.

B: Exports are irrelevant here.

C: This talks about the higher market prices. This could explain the paradox because target – market will become lesser if market becomes higher

D: Size of crops is irrelevant.

E: Between 1982-1983? Retail price? Out of Scope!

Shakespeare was the world's greatest playwright, which means that he must have written the world's greatest plays. The fact that he wrote the greatest plays in the world only goes to prove that he is the world's greatest playwright.

Which of the following statements best matches the argument shown above?

- A. Dr. Smith is the only member of the twenty-strong English department who thinks that Byron wrote greater poetry than Keats. Therefore Byron was not as good a poet as Keats was.
- B. A miscarriage of justice occurs when an innocent person is sent to prison. However, there are no miscarriages of justice because people in prison are guilty. Otherwise they would not have been sent to prison.
- C. The presence of enlarged white corpuscles in the blood would indicate that the patient must be suffering from disease X. However, his blood sample contains no enlarged white corpuscles, so he cannot be suffering from disease X.
- D. Blair denies having committed the robbery, but has implicated Brown. Brown on the other hand, claims that he was elsewhere at the time, and points the finger squarely back at Blair.
- E. I believe that the presence of the tartar sauce helps to accentuate the flavour of the other ingredients, but they in turn release chemicals which tend to neutralise the tartar sauce. Therefore the dish is much less spicy than pure tartar sauce would be.

Although the earliest surviving Greek inscriptions written in an alphabet date from the eighth century B.C., a strong case can be made that the **Greeks actually adopted alphabetic writing at least two centuries earlier**. Significantly, the text of these earliest surviving Greek inscriptions sometimes runs from right to left and sometimes from left to right. Now, the Greeks learned alphabetic writing from the Phoenicians, and in the process **they would surely have adopted whatever convention the Phoenicians were then using with respect to the direction of writing**. Originally, Phoenician writing ran in either direction, but by the eighth century B.C. it had been consistently written from right to left for about two centuries.

In the argument given, the two portions in boldface play which of the following roles?

- A. The first is the position that the argument seeks to establish; the second reports a discovery that has been used to support a position that the argument opposes.
- B. The first is the position that the argument seeks to establish; the second presents an assumption on which the argument relies.
- C. The first presents evidence that is used in support of the position that the argument seeks to establish; the second presents an assumption on which the argument relies.
- D. The first is an objection raised against a position that the argument opposes; the second is the position that the argument seeks to establish.
- E. The first is an objection raised against a position that the argument opposes; the second is evidence that has been used to support that position.

A recent survey of all auto accident victims in Dole County found that, of the severely injured drivers and front-seat passengers, 80 percent were not wearing seat belts at the time of their accidents. This indicates that, by wearing seat belts, drivers and front-seat passengers can greatly reduce their risk of being severely injured if they are in an auto accident.

The conclusion above is not properly drawn unless which of the following is true?

- A. Of all the drivers and front-seat passengers in the survey, more than 20 percent were wearing seat belts at the time of their accidents.
- B. Considerably more than 20 percent of drivers and front-seat passengers in Dole County always wear seat belts when travelling by car.
- C. More drivers and front-seat passengers in the survey than rear-seat passengers were very severely injured.
- D. More than half of the drivers and front-seat passengers in the survey were not wearing seat belts at the time of their accidents.
- E. Most of the auto accidents reported to police in Dole County do not involve any serious injury.

gmatclub
VERBAL

Reading Comprehension

A B C D E

42

A: This is a tricky question. Our aim is to prove a correlation. Let's say 100 people were severely injured and 100 were not. Out of the 100 severely injured, 80 didn't wear seat belts.

Probability of a person not wearing seat belt to get injured = $\frac{80}{100} = 80\%$

Probability of a person wearing seat belt to get injured = $\frac{20}{120} = 16.7\%$

B: Doesn't establish the correlation between what's being said. Hence incorrect.

C: This doesn't even give us a relative indication. Incorrect.

D: This tells us about the number of people who were not wearing seat belts, but not about the number of people who were injured.

E: Completely irrelevant to the scope of the discussion.

VERBAL

Deconstructing SC

69

- **Step 1:** Read the question stem and think of possible errors in the sentence, subject-verb agreement, tense mismatch etc.
- **Step 2:** Read the answer choice and split it into two groups based on overall structure.
- **Step 3:** One of the groups will contain an error. Eliminate the group and re-split the next group.
- **Step 4:** Use process of elimination to rule out wrong answer choices. Don't try to make them fit!
- **Step 5:** Make sure the answer choice makes sense!

gmatclub

VERBAL

And what's not?

71

Three Question Types You Won't See

- **Spelling** – The GMAT will not test you on your knowledge of spellings
- **Punctuation** – Adding a comma or an apostrophe and similar things will not be tested. Semi-colons, however, are tested.
- **Capitalization** – The GMAT doesn't test you on your knowledge of capitalization either.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

What's Tested?

70

Three Question Types You Will See

- **Grammar** – The sentence has to adhere to the rules of grammar followed by Standard English.
- **Meaning** – The sentence has to have a relevant meaning and convey it properly
- **Concision** – If what is being said can be said in five words instead of ten, then the former is preferred (Active vs. Passive voice, for example)

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested

72

Subject-Verb Agreement

- This deals with the issue of plurality.
- Singular subjects must use singular verbs. For example: He **was** eating.
- Plural Verbs must use plural verbs. For example: The elephants **were** walking.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 1: Phrases between subject and verb

73

Remove the additional information and read the sentence without them.

- Barely seventeen and leading the French army wearing a man's armor, Joan of Arc, **an illiterate peasant girl from the French countryside**, broke the seven month-old seize of Orleans in nine days.
- Reading the sentence without that part we have:
Barely seventeen and leading the French army wearing a man's armor, Joan of Arc, broke the seven month-old seize of Orleans in nine days.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 3: Multiple Nouns or Pronouns

75

- If there is more than one noun or the usage of a pronoun in a sentence, then the subject-verb agreement **MUST** be consistent!!
- **Two Exceptions:**
 - Conjunctions (OR, NOR) – Always SINGULAR
 - Usage of EACH or EVERY – Always SINGULAR

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 2: Subject Follows Verb

74

- If there are expletives, then check for subject-verb agreement, by rearranging the sentence.
- **Some common expletives:**
 - There
 - Here
 - It
 - Or

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 4: Indefinite Pronouns

76

- Pronouns like all, any, more, most, somebody, nobody and so on.
- Plurality is based on what the indefinite pronoun is referring to! (This is the antecedent)
- **Exceptions:**
 - Each, Either, Neither, Every, Number – Always singular irrespective of what follows!
 - Example: A number of reasons –Plural! The number of cars – Singular! ("the" is singular and "a" is plural)

gmatclub

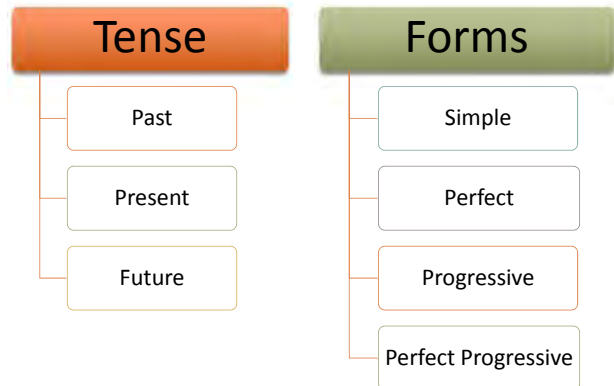

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested

77

Verb Tense

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested

79

Noun Agreement

- The number of nouns must be consistent with what they are referencing.
- **Incorrect:** Matt and Dave believed that their hard work in their engineering class will help them realize their dream of becoming a great engineer.
- **Correct:** Matt and Dave believed that their hard work in their engineering class will help them realize their dream of becoming great engineers.

78

Verb Tense – Sub Types

- Incorrect Verb Tense
- Shift in Verb Tense
- Verb Voice

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested

80

Use of Pronouns

- Pronoun-Antecedent Disagreement
- Incorrect Use of Relative Pronouns
- Ambiguous and Implied Pronouns

© GMAT Club – contributing to each other's learning

VERBAL

Pronoun Error Sub Types

81

Pronoun Antecedent Disagreement

- The pronoun **MUST** refer to it's antecedent.
- The pronoun-antecedent relationship should be consistent throughout the sentence.
- **Incorrect:** Each of the women selected for the scholarship were asked to submit an application.
- **Correct:** Each of the women selected for the scholarship was asked to submit an application.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 2: Indefinite Pronouns

83

- These are very general pronouns – many, few, both, every and so on.
- **Incorrect:** Many of the students were surprised to learn that his or her exam was unfairly graded.
- **Correct:** Many of the students we surprised to learn that their exams was unfairly graded.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 1: Distance btw. pronoun & antecedent

82

- This happens when there is additional information between the pronoun and antecedent making it easy to lose track of the relationship between pronouns and their antecedents.
- **Incorrect:** The library, with it's many books and databases, require a special membership.
- **Correct:** The library, with it's many books and databases, requires a special membership.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 3: Misleading Antecedents

84

- Antecedents that **SOUNDS** plural but actual are singular or vice versa.
- For example, family is singular, and persons is singular too. It might be a group of people in a family, but being a collective noun, it's still singular!

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Pronoun Error Sub Types

85

Incorrect use of relative pronouns

- They relate groups of words to a noun or pronoun – which, whom, whomsoever, where and why.
- Two traps of incorrect usage:
 - ▢ Incorrect Pronoun Choice for People and Things
 - ▢ Difference between who and whom

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 2: Who vs. Whom?

87

- Very simple trick!
- Make the following substitutions:
 - ▢ He – Who
 - ▢ Him – Whom
- The substitution that makes sense will correspond with the correct word in that context.
- Sometimes it might be necessary to rearrange the sentence for it to make sense.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 1: Pronoun Choice

86

- Who and Whom will always relate to people.
 - ▢ The doctor that performed the surgery was honored – should be “who”
- That and Which will always relate to things, i.e. inanimate objects.
 - ▢ The machine who performed the surgery was showcased in the exhibit – should be “that”

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested

88

Modifiers

- Misplacement of adjectives (describes nouns - serene) and adverbs (describe verbs - serenely)
- For example: The new BMW model is designed to drive faster and more **efficient** than the previous model.
 - ▢ The usage of the word “efficient” is wrong here since it’s modifying the verb. The correct word usage would be “efficiently”

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 1: Quantifiers

89

- Errors in Count Nouns (can be counted – trees, bottles, billions). Quantifiers are many, both, few, several, a couple and so on.
- Errors in Non-Count Nouns (cannot be counted – water, liquid). Quantifiers are much, a little, a bit and so on.
- Some modifiers like all, and some can be used for both.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 2: Placement

91

- Misplaced modifiers with relative clauses (like that or which)
 - **Incorrect:** According to the report, bicycles will be confiscated that have not been registered with the university.
 - **Correct:** According to the report, bicycles that have not been registered with the university will be confiscated.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Trap 2: Placement

90

- Misplaced modifiers are modifiers that are placed in the wrong position on a sentence.
 - **Incorrect:** Short on money, the car was the best one Tanya could find.
 - **Correct:** Short on money, Tanya knew that the car was the best one she could find.
- Dangling Modifiers are those where the referent is completely absent.
 - **Incorrect:** Walking to the university, the cat had to stop.
 - **Correct:** Walking to the university, he had to stop because of his cat.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested

92

Comparisons

- Incorrect use of comparative degree
- Illogical Comparisons

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Comparison Sub Type

93

Degree of Comparison

- When there are two objects being compared, you have to use a comparative word. When more than two objects are compared, you have to use a superlative word.
- **Incorrect:** Though the reporters felt that injury played a part in Tennessee's loss to Minnesota, Tennessee's coach said that Minnesota had the best team that night.
- **Correct:** Though the reporters felt that injury played a part in Tennessee's loss to Minnesota, Tennessee's coach said that Minnesota had the better team that night.

VERBAL

Errors Tested

95

Parallelism

- Parallel Verbs and Verb Form Errors
- Parallel Noun Errors
- Parallel Prepositions and Articles
- Parallel Conjunctions
- Parallel Comparisons

© GMAT Club – contributing to each other's learning

VERBAL

Comparison Sub Type

94

Illogical Comparison

- Only similar objects can be compared. You cannot compare a human to a dog.
- **Incorrect:** Though the recent Lays food poisoning incident has caused some buyers to question its quality, the Lays chips are sold more often than any other food company.
- **Correct:** Though the recent Lays food poisoning incident has caused some buyers to question its quality, the Lays chips are sold more often than those produced by any other food company.

© GMAT Club – contributing to each other's learning

VERBAL

Parallelism Sub Type

96

Verb Errors

- Nouns are naturally parallel. But when they are in the form with an –ing at the end (gerunds), they are confused for verbs.
- **Incorrect:** The common symptoms of the stomach flu are indigestion, vomiting and drinking less water than usual.
- **Correct:** The common symptoms of the stomach flu are indigestion, vomiting and decreased water intake.

© GMAT Club – contributing to each other's learning

VERBAL

Parallelism Sub Type

97

Noun Errors

- When a sentence has two or more similar parts linked by a conjunction, each part has to be of the same verb form.
 - **Incorrect:** The new exam pattern requires students to enter their student IDs and signing their names on the roster.
 - **Correct:** The new exam pattern requires students to enter their student IDs and sign their names on the roster.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Parallelism Sub Type

99

Parallel Conjunctions

- The conjunctions used must be parallel in structure.
- Some examples:

Neither ... nor	Either ... or
Not only ... but also	Both ... and
Whether ... or	As ... as

- **Incorrect:** The restaurant not only hired a new chef, but **it** also expanded its seating capacity.
- **Correct:** The restaurant not only hired a new chef, but also expanded its seating capacity.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Parallelism Sub Type

98

Prepositional/Article Errors

- A preposition and an article must either be used by all parts of a sentence or by just the first part.
 - **Incorrect:** By doing each assignment, turning in homeworks on time and by attending all the classes, one might be able to obtain the highest grade in the class.
 - **Correct:** By doing each assignment, turning in homeworks on time, and attending all the classes, one might be able to obtain the highest grade in the class.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Parallelism Sub Type

100

Parallel Comparisons

- When comparisons are left unparallel, that can amount to an error as well.
 - **Incorrect:** In the book, the author mentions that he found editing pictures much more arduous and difficult than when he had to take the actual pictures.
 - **Correct:** In the book, the author mentions that he found editing pictures much more arduous and difficult than taking pictures.

gmatclub

VERBAL

Errors Tested Idiom Rules

104

Among vs. Between

Among:

- Used when more than two items are in question.
- Example: He was the best among three candidates.

Between:

- Used when two items are in question
- Example: He was the best between the two of them.

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested Idiom Rules

105

Both vs. Each

Both:

- Used to point out similarities.
- Example: Both of them were good at swimming.

Each:

- Used to point out differences/dissimilarities. (Always singular)
- Example: Each girl had her own niche.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested Idiom Rules

107

Each Other vs. One Another

Each Other:

- Used to compare two things.
- Example: They loved each other dearly.

One another:

- Used to compare more than two things.
- Example: The three brothers loved one another dearly.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested Idiom Rules

106

Twice vs. Double

Twice:

- Twice/Thrice etc. are used for comparison
- Example: The Toyota was twice as fast as the Honda.

Double:

- Used as a verb only.
- Example: He more than doubled his wealth by investing in stocks.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested Idiom Rules

108

If vs. Whether

If:

- Primarily used only in "If ... else" sentences.
- Example: If this is true, the market will collapse. Else, it will be okay tomorrow.

Whether:

- Used more frequently as a comparison.
- Example: Whether or not he chooses to accept the prize is up to him.

gmatclub

© GMAT Club – contributing to each other's learning

VERBAL

Errors Tested Idiom Rules

109

Like vs. Such As

Like:

- Used when indicating similarities between things.
- Example: Like John, Amy was a violinist too.

Such as:

- Used to list examples.
- Example: There are different kinds of tigers such as the Bengal Tigers, white tigers and so on.
